SIG 03 - ENT - Entrepreneurship

With our theme Exploring the Future of Management: Facts, Fashion and Fado, we invite you to participate in the debate about how to explore the future of management. We look forward to receiving your submissions.

GT03_00 - Entrepreneurship General Track

Proponents:
Matthias Raith, Otto-von-Guericke University; Lucrezia Songini, University of Eastern Piedmont; LUCA GNAN, TOR VERGATA UNIVERSITY

Short description:
The SIG Entrepreneurship General Track aims to develop an ongoing and constructive dialogue among entrepreneurship scholars to conduct research that is relevant for entrepreneurship theory and practice in the contemporary world. This general track is intended to capture new and emerging research areas within as well as classical areas of study of entrepreneurship. In line with our mission – methodological, theoretical and empirical pluralism in entrepreneurship research – we welcome contributions from all areas related to entrepreneurship that are not explicitly covered by the other tracks sponsored by the SIG.

Long description:
Entrepreneurship is a working attitude, a mode of thinking, a concrete everyday practice and increasingly an identity marker for ways of being and living within liquid modernity. Entrepreneurship is nowadays a broadly endorsed and accepted signifier for forms of organizing that targets human, organisational, and economic renewal and growth. While empirical evidence for these politically and individually appealing ends are to be found, the contingency and “contextuality” of the myriad of entrepreneurial forms of organizing may humble us in face of the elusive quality of entrepreneurship; the more determined the efforts to pinpoint, box and fence it get, the more it retreats back to various in-between voids. Such a quality is unbearable for conceptual monopolists and impractical for those in positions where efficiency and effectiveness are agenda setting norms, why the discourse on entrepreneurship is a constant prey for unidirectional advocates.

Accordingly, and in line with our mission – methodological, theoretical and empirical pluralism in entrepreneurship research – we welcome contributions from all areas related to entrepreneurship that are not explicitly covered by the other topics sponsored by the SIG. Papers adopting different theoretical lenses or using different research methods to explore
entrepreneurship and are strongly encouraged. The general track specifically welcomes innovative contributions related to the following topics:

- Entrepreneurial Social Capital and Entrepreneurial Social Networks,
- Effectuation vs. Causation,
- Entrepreneurship and performance,
- Innovative research methods in entrepreneurship (both qualitative and quantitative),
- Neuroscience entrepreneurship,
- Historical approaches to entrepreneurship,
- Corporate entrepreneurship and intrapreneurship,
- Academic entrepreneurship and the entrepreneurial university,
- Entrepreneurship education,
- Senior-entrepreneurship

**Keywords:**
Effectuation vs. Causation
Entrepreneurship education
Academic Entrepreneurship
Entrepreneurial University
Senior Entrepreneurship
Qualitative and Quantitative Methods
